4 Bar Roof Rack, Plus Full Width Rear Roller Bar, Side Rails and Wind Deflector

What you receive when you purchase this roof rack:

- 4 x Mega duty fully galvanized round cross bars
- 1 x Mega duty fully galvanized full width rear roller bar
- 1 x Wind Deflector (fitted to front bar)
- 2 x Fully galvanized full length side rails
- 8 x Stainless steel load stop end brackets
- 1 x Stainless steel complete fitting kit and full fitting instructions

EAZiFiT:

As we supply you with step-by-step instructions and colour code all the brackets and bars. The rack is easily assembled on the roof of the vehicle it is to be fitted to by only one person, we even colour code the bags the fittings come in, e.g. “**Brackets to Roof**” and “**Bars / Side Rails to Brackets**”. All the brackets fit to the vehicle manufacturers roof rack mounting points so no drilling is required.

EAZiLOAD:

When the rack is assembled onto the vehicle, the loading is a simple task as the rack has a full width rear roller bar that protrudes beyond the rear of the vehicle or to the top of the tailgate to stop any rear damage to the vehicle. The heavy-duty side rails also make the securing of loads a very easy task.

BUILT FOR STRENGTH - BUILT TO LAST:

The crossbars are manufactured using tubular fully galvanized (inside and out) 34 x 3mm thick bars, thus ensuring they can carry loads that well exceed the vehicle manufacturers weight limits. To carry these mega bars we have also up-rated the brackets to carry them. These are specially laser cut and folded for maximum strength using 3mm stainless steel; therefore again able to carry loads that exceed the vehicles weight limits and also giving a shiny life long appearance to the vehicle.

SPECIAL OFFER:

As we manufacture the Van-Net “EAZiFiT / EAZiLOAD” roof rack systems, we are able to sell them on at specially discounted rates to the end user, thus cutting out any middle man and giving **you** the discount.

DELIVERY:

As a customer service priority, we will do our best to ensure that your roof rack will be dispatched within 1 working day of payment. An email will be sent to you confirming your order, letting you know who the carrier is and giving you a consignment number to track your goods.

PAYMENT:

- This roof rack can be purchased directly from this web site, by clicking on the shopping basket. We can also accept:
- Postal Orders.
- Personal / Company Cheque – 4/5 days to clear, before dispatch.
